THE IRRIGATION CONGRESS

Preparations for the Third National Irrigation Congress, which will assemble in the Broadway Thestre, Denver, September 3d, are being rapidly pushed, both by the local and national committees. Indications are favorable for the most important gathering which has ever met in the name of irrigation, The times are ripe for a great forward movement, and the West is ready to say what it wants and the Country, under the pressure of events, is at last ready to listen. The programme of the seven days' meeting will inclade the following features:

Irrigation commissions have been at work for a year in eighteen States and Territories collecting facts and opinions upon which to base recommendations for a national policy and code of common State laws. These commissions will have seats in the Congress and give the body the benefit of their knowledge and experience. It is already known that the reports will cover a wide variety of plans, ranging all the way from public to private control and from national to State supervision. These reports alone would furnish the basis for the most interesting congress ever assembled in the West.

Men will come from all over the United States, from all trades and professions and from all political parties to contribute their share to the making of a national irrigation policy. It is hoped that this will be the final clash between land cessionists and anti-cessionists and that a compromise can be arranged which will unite all factions. It is hoped that the outcome will be a bill, framed in definite terms, for presentation at Washington. The bill will probably be supported by a ringing address to the American people. If these results are accomplished the Denver Congress of 1894 will be historic.

This congress is most timely for the people of the semi-arid portions meets at Reno next Friday. The of the Mississippi valley whose crops have been laid waste by the recent hot winds. The congress will bring together the men best capable of dealing with the problem of the semiand western Texas is expected to be very large.

This congress will mark the ontrance of a new element into the do main of irrigation inquiry. Georgia has appointed an irrigation commission, consisting of five of her prominent citizens and promises a delegation of from 50 to 100 delegates. Florida will also send a delegation. The Governors of eastern States are naming delegates very generally and it is probable that immense interests in the possibilities of eastern irrigation will result from the debates under this head of the

Arrangements have been made for a striking exhibition of irrigation machinery and appliances at Denver during the Congress. This will be shown in practicel operation, a large ground space having been engaged near the Broadway Theatre, the water being furnished from city mains. This feature of the great congress alone should be sufficient to attract an immense gathering of students of the practical side of irrigation.

SUTRO'S BOLD IDEA.

Some weeks ago Adolph Sutro outlined to the writer a plan for making a silver fight which seems to be about the most novel yet practi-

cal idea yet advanced. He said: "There is now but one leading power opposing silver remonetization, namely England. The bankers and capitalists constitute the power that keeps silver down, My plan would be for the other nations who favor remonitization to subscribe to a campaign fund and carry the fight for silver right into England. With half a million dollars or 1 think a great deal less, a winning fight could

be made for the white metal. My plan would be to take a number of able silver speakers into Eng- picturesque country. Vade Clarke land and address the people on the subject. All that would be necess- ber of improvements and the place is ary would be to educate the masses | more attractive than ever before,

in England on the question and when once this was realized there would be such a tide set in favor of silver that no political party who stood out for the single gold standard could remain in power.

England is now the stumbling block in the way of the world adopting the double standard. There is so much at stake that it would be a mere bagatel from a business standpoint for the other nations to chip into the pool and carry the fight into the lair of the gold standard, which is England. This would also brush aside the only excuse the old parties have had for years as a reason for not doing justice to silver.

IN THE HANDS OF THE DEL-EGATION.

In response to inquiries from various parts of the State the editor of the APPEAL will say that the question of his candidacy before the State Convention is entirely in the hands of the Ormsby county delegation,

Whether he runs for any political office or don't run at all is a matter which rests soley with them.

One thing is certain, that whatever the delegation or the Convention may decide in the matter, too APPEAL will be where the fight is hot est during the silver campage. no figure whatever.

A Strong Resolution For Si. or

Washington, Aug. 21. - Representative Harman of Montana presented in the House today resolutions for the free coinage of silver.

The resolutions have been considered and adopted during the present session by the most powerful labor organizations of the country, and are signed by the chief officers of the various unions.

The resolutions are as follows: 'We demand of the present Congress an immediate return to the money of the Constitution as established by our fathers, by restoring the free and unlimited coinage of silver at the ratio of 16 to 1; coins of both metals to be equally full legal tender for all debts, public or private, as before the fraudulent demonetization of silver in 1873, We also condemn the issuance of bonds for 'the National debt in time of peace, and the use of interest bearing bonds at any time.

The Republican State Convention Helena Independent gives this timely

"Beware of the Republican Convention and its seeming silver resolutions. The unbroken record of arid regions, and ought to result to the party is that of hostility to the the vast good of that section. The white metal, and it has chosen canattendance from Kansas, Nebraska didates who were goldbugs. The last expression of choice for a Presidential candidate was at the League meeting in Denver, when McKinley, the yellowest of all the goldbugs, was the almost unanimous choice. Even the local sentiment of the great silver State of Colorado was not able to make a respectable showing in the greatest city in the silver producing region in a Republican gathering."
